Since there is more exposed surface area with honed finishes, water marks, finger prints and other signs of daily living may show. Most of these marks can be easily removed with little effort and non-abrasive cleaning products such as Soft Scrub Liquid Gel. Please consult your Caesarstone representative or our website to obtain more information or a sample.

# Edge Profiles

Your surface is not complete without an edge profile to complement your slab selection and space. With Caesarstone, selecting the best fit is easy. The unique properties and durability of Caesarstone quartz surfaces allow for a wide range of edge-profile design options.

Many edge profiles are possible, from a standard edge to laminated or mitered edges which create the appearance of a thicker slab. All edge details should have a minimum 1/8" radius on any profile, for both top and bottom edges. For high-traffic areas, 1/4" minimum radius is suggested.

# Wall Applications

Caesarstone has specially selected a range of colors and designs in 13mm thickness for wall applications.

Because Caesarstone quartz surfaces are nonporous and mold and mildew resistant, they are ideal for kitchen back-splashes and bathroom wall panels. Large slab sizes provide a sleek and modern aesthetic, minimizing joints and maintenance.

# Caesarstone Slab ID

The underside of every Caesarstone slab is uniquely stamped with identification information establishing authenticity.
